

JEEP CJ OR YJ BOATSIDE ROCKER PANEL INSTALL INSTRUCTIONS

The Jeep CJ or YJ boat side rocker panels are not your average rocker. **DAVE'S CUSTOMS UNLIMITED** now offers the **"TRUE"** boat side rockers for the Jeep CJ or YJ, 1976 to 1995 panel protection. Designed more for the hardcore individual that does not mind cutting the stock rocker panel area of the body. Now you can protect the sides of your Jeep with the ultimate rocker clearance. Designed to mount from the front wheel well to rear wheel well openings. Designed to fit like a glove with our comp cut corners.

Angled at 45 degrees, you can gain about 4 inches of clearance allowing you to squeeze through tight obstacles. Laser cut and CNC bent from 3/16" steel. Includes stainless Allen head countersunk mounting hardware.

Start the installation by loosening or removing front and rear fender flares. Remove both front seats and pull back carpeting inside jeep. Also pull back wiring that runs below door openings.

Measure about 2" down from bottom of door opening. Make a line on outside of body. This will be the outside cut.

The use of a Speed square is the easiest to mark the inside of the fender wells. It has a 45° angle on it to match the boatsides. Once the front and rear fender wells are marked, you can make a cut through the floor. Then, you can draw a line on the floor front to back for your floor cut. Once everything is measured out and lines are drawn, you can begin your cuts. A plasma cutter works the easiest but you can use a cut off wheel, jigsaw, or sawzall. **Note: Before you make your cuts, make sure everything is moved out of the way on the inside of the jeep.**

Once you have cut and removed the rocker section, clean up the edges with a grinder and touch up any bare metal with paint or undercoating. Loosen side body mount bolts. Note: Boatside will be sandwiched between floor and center body mount! Clamp boat sides up against body. Once you are happy with the positioning, the outside holes can be drilled. You will need to use a 3/8" drill bit. **Note: Access holes may need to be made on the inside of the body because of a double wall to install the nuts.**

Once holes are drilled, boat sides can be bolted up. When you are happy with the fit, boat sides can be removed and painted or powdercoated, then reinstalled for good. **Note: Once installed for good, make sure to retighten the body mount bolts.**

FIT and TOLERANCES: All parts sold by Dave's Customs Unlimited, LLC are the results of countless hours of research, testing, fitting, and refining. There is a large variation in tolerance from vehicle to vehicle. In addition to the factory tolerances, most people install other than factory equipment (aftermarket add-ons). Dave's Customs Unlimited, LLC has done the best job we can to ensure that our parts fit with some of these possibilities. This is why Dave's Customs Unlimited, LLC installs "several slots" in which to mount our brackets and other products; however, you may find it necessary to grind, elongate, bend, or force the parts you buy to fit on your particular vehicle. Be sure that you want to install them before you modify them. Please use common sense when installing these parts and let us know how we can improve them.
